MiniTool Partition Wizard Description: Minitool Partition Wizard is a free partition tool that will scan and detect all your partitions on your computer and enable you to easily split, merge and extend all the partitions. Design - Programming - Development - Open Source Useful? Check price on Amazon. iMazing 2.7 Description: My Computer Apps, Windows Apps, and Free Drivers. Design - Programming - Development - Open Source Useful? Check price on Amazon. Easy Driver Updater Description: Easy Driver Updater is a free software that downloads your computer's drivers, games, applications, and support programs directly from the Internet and installs them for you. Design - Programming - Development - Open Source Useful? Check price on Amazon. If you're like a lot of people, you have more than one computer running Windows and may even have one running Mac OS X. You might even have your personal files on a separate drive or partition that you boot to daily. That could mean having to transfer files back and forth between computers. I don't know about you, but the thought of dragging and dropping the files from a mouse to a different computer makes me want to throw up. It's a time consuming process that can be completely avoided by using file sharing software like DropBox, Google Drive, OneDrive and others. Today we're going to show you how to set up DropBox or Google Drive on both of your computers in less than five minutes. To see the step by step process of how to set up DropBox or Google Drive on your Mac or PC, just

What's New in the Sincronizador?

SyncToy is a free app developed by Microsoft for Windows 7, 8, 10. It is a Windows utility used to sync your files between different computers. It allows you to easily synchronize files, folders, and libraries between all computers on your home network, and to keep them up to date with each other. The program doesn't require any additional installation on the target computer, as it can be run from any local drive, USB drive or CD/DVD, and even from any USB pendrive. SyncToy is a powerful tool that makes it easy to keep your files synchronized between computers on a home network. With

SyncToy, you can quickly copy files, folders, and libraries between computers, for example between a laptop, tablet or PC. SyncToy has more than 20 other features, and makes it easy to synchronize files, folders, and libraries between your computers. SyncToy is available for both Windows 7, 8, 10 (32-bit and 64-bit). Features: - Create a schedule to automatically synchronize files, folders, and libraries at the same time every day, or on a schedule. - Backup files, folders, and libraries automatically to a network share, and from a network share to a backup disk. - Synchronize files, folders, and libraries with a password. - Keep your files up to date with different computers on your home network. - Update each computer individually, or synchronize all of your computers at once. - Keep your files up to date across the whole network, or only between specific computers. - Check the status of the synchronization. - Use the app's built-in help. - Control the behavior of the synchronization. - Automatically start synchronizing files, folders, and libraries at the same time every day, or on a schedule. - Backup files, folders, and libraries to a network share, and from a network share to a backup disk. - Synchronize files, folders, and libraries with a password. - Synchronize a library with a specific filter and from all computers in the network. - Synchronize all of your computers at once. - Synchronize files, folders, and libraries in a specific order. - Perform a backup from a local disk to a network share. - Create a backup disk to a network share, from a local disk, or even from a USB pendrive. - Set permission levels for each computer. - Select the location where the backup files are stored. - Create a backup disk from a network share, from a local disk, or even from a USB pendrive. - Show the process in the system tray, and with progress and warning notifications. - Use the app's built-in help. - Control the behavior of the backup. - Have the backup run immediately after starting the synchronization. - Perform a backup at a
