I'm going to pick this up simply because I'd appreciate an updated and fun take on the elder scrolls franchise. Much like Skyrim, I'll play this solely due to the fact that it will be very enjoyable. I know what it's about already, but that's why I love roleplaying games. Oh, and when are you going to have a copy of Sanctum? You've been working pretty hard on that lately. :P Master_Consul 12-28-2004, 06:02 AM This game looks pretty good! There's a lot of

Q: Convert string of XML tags into Tags themselves I have some XML content that is stored in a string. I want to be able to convert the string into a valid XML document. The problem is that the the content is in a string and not an actual document. i.e. the string is "value1value2" I'm looking for a solution where I don't need to use any library - just a simple method using String. I was thinking that the string should be converted to an XML document and then strip the tags out. A: If you just want to take the strings and turn them into XML documents, then you can try:

```
var str = "value1value2"; var doc = new XmlDocument(new XElement(str));
```

 You can use it like this:

```
var doc = "value1value2";
```

 Or whatever else you need to do with it.

A: You should be able to do it using the XML classes:
XmlDocument doc = new XmlDocument();
doc.Load(stringXml); // Do stuff to create XML document
XmlDocument doc2 = new XmlDocument();
doc2.LoadXml(stringXml); The Load method of
XmlDocument will accept string parameters, and convert
them into an XML document. As Memorial Day
approached,
