Join the Beautiful world of Virtual Sex!! 1,860,135 views.Q: jquery ie 10 bug I've this code: \$(".sortable li").hover(function() { if(!\$(this).data('unchecked')) return; \$(this).addClass("checked"); }, function() { if(!\$(this).data('checked')) return; \$(this).removeClass("checked"); }); This code works fine in all browsers but in IE9 and 10 the code never enters to the 2nd function (function()). If i write if(!\$(this).data('checked')) return; in the 2nd function, the first function does not work at all (as before). In IE10 these 2 functions don't work at all. I tried to add z-index: 1; to li and.sortable to no avail. the.checked class is a simple span. Note: in IE9 and earlier it doesn't even enter to the first function, so i can't try it. Also, i'm not js newbie, but i have never seen this before, so it might be a bug. What can i do? A: .data('checked') can't be true even if the element is rendered, if it's not added to the DOM. Try to ensure that it becomes true before you're going to check it: \$(".sortable li").hover(function() { if(!\$(this).data('unchecked')) { \$(this).addClass("checked"); } }, function() { if(!\$(this).data('checked')) { \$(this).removeClass("checked"); } }); Novel integral phase-contrast imaging techniques without calibration. Integral phase-contrast imaging (IPCI) is a powerful new tomographic imaging technique capable of providing information on magnitude, transmission and phase objects by recording a c6a93da74d
